

The image shows three shelves of mushroom grow kits, each containing a small wooden log with a growing mushroom. The mushrooms are in various stages of growth, with some showing distinct gills. The entire scene is illuminated with a strong blue light, creating a cool, futuristic atmosphere. The grow kits are arranged in rows on the shelves.

Caley Bros.

M U S H R O O M S

Welcome to the Caley Brothers - we are two sisters who began growing mushrooms in 2019, inspired by our love for delicious, sustainable food.

Today, we share that passion through hands-on workshops and masterclasses that take you on a mushroom-growing journey - from preparation to harvest.

Why Choose Our Workshops?

- **Team Building Anywhere** – we bring the workshop to your workplace or event
- **Sustainability in Action** – explore fungi's role in ecosystems & circular thinking
- **CSR Impact** – sessions can support schools, charities, or community projects
- **Takeaway Value** – every participant leaves with a grow kit & fresh ideas
- **The Wow Factor** – from waste to gourmet mushrooms in weeks

What to Expect - guests discover the mushroom-growing process through live demonstrations and hands-on making. Everyone leaves empowered to continue the journey at home with their own gourmet mushroom kit.

Bring your team together and give back - let's create a sustainable growing experience.
